3. LINES OF MENSURATION

1. _____

2. _____

3. _____

b. Cervical Curve

Well Maintained Reduced

Straightened Mild

Reversed Mod

c. Spine in Midline

None Lt Rt

Mild Mod Sevr

d. Lateral Listing-Region

None Lt Rt

f. Spinal Compression Fractures

None Present At Level _____

Wedging: Anterior Lt Lat Rt Lat

Step Defect Endplate Disruption

Zone of Impaction (Radiopaque Band)

g. Lytic / Blastic Changes

None Present At Level _____

Cortical Thick. Localized Inc. Density

Moth-Eaten Diffuse Inc. Density

Permeative Ivory Vertebra Sign

4. SOFT TISSUE ANOMALIES None

5. OF ADDITIONAL NOTE/OBSERVATION

cName=Bubble1498 | TYPE=U | Yp=634 | Xp=809 | Sr=30 | Sc=38 | Fr=31 | Fc=9 | Fp=1498 | A5B[1] | Observation 1-Observation

NUM 3:51:08 pm

(5.) OF ADDITIONAL NOTE/OBSERVATION - Cervical, Thoracic and Lumbar

The A thru H bubbles correlate with the A thru H sections of the form.

For example, if you bubble the (A) bubble in this section the information you type into the query will go into the “Degenerative Changes” section of the report. If you bubble the (C) bubble, the information you type in will go into the “Spine in Midline section”, etc.

If you bubble the 1 thru 8 bubbles the information you type in the query will go at the end of that whole section.
